TAKE ADVANTAGE OF OUR EXPERIENCE AND KNOWLEDGE

Feeding **horses, pigs, fish, shrimp, broilers, layers, breeders and cattle.**

Disposing of the largest range of proteins we produce concentrates ranging from **2.5 to 40% inclusion rate** in your complete feed.

Your private label or our own brand in 25 to 50 kg bags or big bags on pallets or stuffed in a 20' or 40' container.

Producing probably the best **extruded pre-starter** for fish feed for with the highest digestion and palatability, as well as with the perfect granulometry.

Fully automated plant with tracking and tracing monitoring every step of the process.

Located in the **Port of Antwerp** providing us direct access to all terminals of the major shipping lines and assuring the lowest logistical cost by barge or truck.

Worldwide shipping to **farms, integrators and dealers.**

In-house expertise with our team of nutritionists, veterinarians and farm managers.

Scientifically well-balanced feed with the objective of producing farm end products such as meat, eggs, fish and milk at competitive prices.

Assuring the highest quality through a continuous update of matrix values based on analysis of incoming raw materials, our finished products in our laboratory and monitoring of undesirable substances (heavy metals, microbiological contaminations, ...) based on a HACCP risk assessment. We are certified according ACS & FCA standards.

Being part of a larger group selling 300,000 MT complete feed in Belgium, we have a **competitive raw material supply** chain.

Single point of contact for your purchase order.

Giving you **complete peace of mind** regarding documentation and logistics with your preferred shipping line.

Offering **EXW, FAS, FOB or CIF shipments** to your final destination.

LSAQUA CONCENTRATES AQUACULTURE

SUSTAINABLE NUTRITION FOR A HEALTHY FUTURE IN AQUACULTURE

We are committed to shaping the future of the aquaculture sector. With our innovative, eco-friendly concentrates, we provide a solution that is both sustainable and effective.

Why choose our concentrates?

- ✓ **Complete nutritional value:** Enriched with essential proteins, vitamins, and minerals to support optimal growth and health.
- ✓ **Environmentally friendly:** Our products contribute to a lower ecological footprint and help protect natural fish stocks.
- ✓ **Cost-effective:** Affordable alternatives that match or exceed the performance of traditional fishmeal.
- ✓ **Suitable for various species:** Specifically developed for fish, shellfish, and other aquatic species.

What makes us unique?

Essential nutrients: Alongside high-quality proteins, our concentrates offer a balanced range of vitamins and minerals crucial for strong bones, healthy tissues, and a robust immune system.

Improved feed conversion ratio: Achieve higher yields with less feed, ensuring efficient production.

Promotes sustainable growth: Encourages the healthy and robust development of your aquaculture species.

Building Immunity: Our fish feed contains a specially designed mix of probiotics and prebiotics that support gut health and enhance the overall immunity of the fish. This helps prevent diseases and promotes faster recovery after stressful periods. Additionally, our formulas are enriched with essential vitamins such as vitamins A, C, D and E, and **Building Immunity through Microbiota Modulation**.

In some formulations through the inclusion of **Single-Cell Protein (SCP)**, we enhance the diversity and balance of the microbial communities in the gastrointestinal tract, which plays a pivotal role in regulating immune responses. SCP provides a rich source of essential amino acids, vitamins, and bioactive compounds that support the growth of beneficial microbes, thereby improving gut health, boosting disease resistance, and promoting recovery from stressful conditions. This microbiota modulation strengthens the fish's immune system, contributing to reduced disease susceptibility and better overall health.

A step forward for your business and the planet

Our concentrates not only deliver economic advantages but also support a sustainable and responsible approach to aquaculture.
