Group Depre NV - Vaart-Noord 11 - B 8730 Beernem - Belgium

## TAKE ADVANTAGE OF OUR EXPERIENCE AND KNOWLEDGE

Feeding **horses, pigs, fish, shrimp, broilers, layers, breeders and cattle.**

Disposing of the largest range of proteins we produce concentrates ranging from **2.5 to 40% inclusion rate** in your complete feed.

**Your private label** or our own brand in 25 to 50 kg bags or big bags on pallets or stuffed in a 20' or 40' container.

Producing probably the best **extruded pre-starter** for fish feed for with the highest digestion and palatability, as well as with the perfect granulometry.

**Fully automated plant** with tracking and tracing monitoring every step of the process.

Located in the **Port of Antwerp** providing us direct access to all terminals of the major shipping lines and assuring the lowest logistical cost by barge or truck.

Worldwide shipping to **farms, integrators and dealers.**

**In-house expertise** with our team of nutritionists, veterinarians and farm managers.

**Scientifically well-balanced** feed with the objective of producing farm end products such as meat, eggs, fish and milk at competitive prices.

**Assuring the highest quality** through a continuous update of matrix values based on analysis of incoming raw materials, our finished products in our laboratory and monitoring of undesirable substances (heavy metals, microbiological contaminations, ...) based on a HACCP risk assessment. We are certified according ACS & FCA standards.

Being part of a larger group selling 300,000 MT complete feed in Belgium, we have a **competitive raw material supply** chain.

**Single point of contact** for your purchase order.

Giving you **complete peace of mind** regarding documentation and logistics with your preferred shipping line.

Offering **EXW, FAS, FOB or CIF shipments** to your final destination.

LSAQUA FISH FEED

# HIGH-QUALITY COMPLETE FISH FEED FOR OPTIMAL RESULTS

## Better Feed Conversion

The success of fish farming heavily depends on the efficiency of feed conversion (FCR – Feed Conversion Ratio). Our fish feed is carefully formulated to achieve a low FCR, meaning your fish need less feed to achieve the same amount of weight gain. This not only results in cost savings but also promotes more sustainable production.

## Faster Growth

Our complete feed formulations contain the right balance of proteins, fats, carbohydrates, vitamins, and minerals that are essential for healthy and rapid growth. By optimally supporting the nutritional needs of the fish, we ensure that your fish populations reach market weight faster, resulting in shorter farming cycles and higher productivity.

## Reduced Mortality

Feed quality plays a crucial role in minimizing stress and diseases, which often lead to mortality. Our feeds are enriched with antioxidants, omega-3 fatty acids, and other bioactive compounds that help strengthen the fish's immune system, reducing mortality rates significantly in your farms.

## Building Immunity

Our fish feed contains a specially designed mix of probiotics and prebiotics that support gut health and enhance the overall immunity of the fish. This helps prevent diseases and promotes faster recovery after stressful periods. Additionally, our formulas are enriched with essential vitamins such as vitamins A, C, D and E, and **Building Immunity through Microbiota Modulation**.

In some formulations through the inclusion of **Single-Cell Protein (SCP)**, we enhance the diversity and balance of the microbial communities in the gastrointestinal tract, which plays a pivotal role in regulating immune responses. SCP provides a rich source of essential amino acids, vitamins, and bioactive compounds that support the growth of beneficial microbes, thereby improving gut health, boosting disease resistance, and promoting recovery from stressful conditions. This microbiota modulation strengthens the fish's immune system, contributing to reduced disease susceptibility and better overall health, known for their immune-boosting properties in fish.

## Suitable for Various Species:

Our feed is specially developed for a wide range of fish species, including but not limited to:

- ✓ **Tilapia:** A popular choice in aquaculture, our feeds promote fast growth and help maintain strong health in this freshwater species.
- ✓ **Catfish:** Formulations that accelerate growth and improve overall disease resistance for this demanding species.
- ✓ **Trout:** Optimized to support the health and immunity of trout, with a focus on improving feed conversion and reducing mortality.
- ✓ **Shrimp:** For strong shrimp population development, with a formulation that promotes healthy growth and strengthens immunity.
- ✓ **Carp:** Our feeds contribute to rapid growth and robust health in carp, even under less-than-ideal conditions.
- ✓ **Sea Bass:** Formulated for optimal growth and immune support in sea bass, ensuring higher survival rates and faster weight gain.
- ✓ **Seabream:** Designed to enhance the health and growth of seabream, supporting both feed efficiency and robust immunity.
- ✓ **Other Freshwater and Saltwater Fish:** Our feed is suitable for a wide range of other fish species, from freshwater fish to saltwater species, with precise adjustments for specific nutritional needs.

## Features of Our Fish Feed:

- **Optimal Nutritional Value:** Formulations that meet the specific needs of various fish species.
- **Sustainable and Responsible:** Made with carefully selected ingredients to minimize the ecological footprint.
- **Scientifically Backed:** Formulations developed in collaboration with leading aquaculture researchers and specialists.

## Benefits for the Farmer:

- **Lower cost per kilogram of produced fish** due to improved feed conversion.
- **Less loss due to disease and mortality** through enhanced immunity.
- **Higher production volumes** through faster growth and shorter farming cycles

## Trust in Quality, Choose Results

Our feeds are the result of years of experience and scientific research, aimed at helping the aquaculture industry achieve sustainable and profitable outcomes.

## YOUR EXPERIENCED PARTNER WITH A PASSION FOR NUTRITION

### DEDICATED TO YOUR SUCCESS

GROUP DEPRE Concentrates offers a complete range of concentrates, pre-starters, complete feed and raw materials for horses, pigs, fish, shrimp, broilers, layers, breeders and cattle. We specialize in the production of high protein concentrates tailored to your specifications in our strategically located plant in the Port of Antwerp.
